- The transactions that will require a pin are the following:
  - Excluding Students (Mandatory and Supplemental)

The Student Alert system is available through the WebFaculty Instructor system. This process allows instructors to submit alerts of various types for students. The alerts can be section related or any alerts that might provide information to the different services that are offered by the college. The data will be available for the service departments to use and will allow them to reach out to students and offer them services that they may benefit from, based on the instructors observation. Instructors also have the option of not communicating the alerts to the students by utilizing the referred service option. This option will record the information regarding an alert on a student and have it available in the database for the individuals designated to handle the data for the alerts.
