WHAT IS A FULL STACK DEVELOPER?

A full stack developer is a web developer or engineer who works with both the front and back ends of a website or application—meaning they can tackle projects that involve databases, building user-facing websites, or even work with clients during the planning phase of projects. The A.S. Degree in Full Stack Development provides necessary skills required to design and code web applications. Core skills include introduction to computers, databases, programming logic and design, and programming languages. The emphasis in Full Stack Developer provides comprehensive coverage of both client-side and server-side web programming. In teaching programming and scripting languages employed to build desktop and mobile applications. Relational and NoSQL databases are also introduced.

LAMC DEGREES & CERTIFICATES OFFERED

- **Certificate of Achievement in Full Stack Developer**
